INVENTORY ? TRADING ? BUSINESS INSIGHTS

PaperFlow Dashboard & System Guide

A clear, practical introduction to the paper inventory management dashboard, its live business indicators, charts, and day-to-day workflows.

DEMONSTRATION DATA ? NOT REAL BUSINESS TRANSACTIONS

Sales today	Purchases today	Sales this month	Purchases this month
PKR 18,995.00	PKR 0.00	PKR 1,477,057.60	PKR 1,311,552.00

AT A GLANCE

Operational snapshot

Current figures from the local demonstration database ? 24 October 2026

Active products	Stock on hand	Customers / vendors	Workers / low stock
4	3,481 units	3 / 2	1 / 0

What this preview demonstrates: the figures and charts are linked to recorded sales, purchases, product variants, parties, workers, and stock movements. As sample transactions are added, the dashboard totals and graphs update from the database.

READING THE DASHBOARD

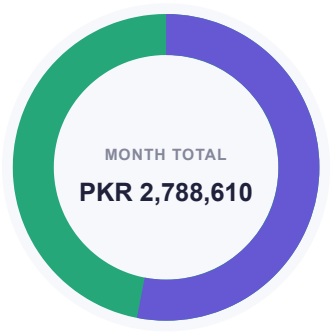

Sales and purchasing activity

Compare purchasing with revenue at a glance, then use the daily trend to spot changes across the most recent two weeks.

Monthly comparison

MONTH TO DATE

Sales vs purchases ? current month

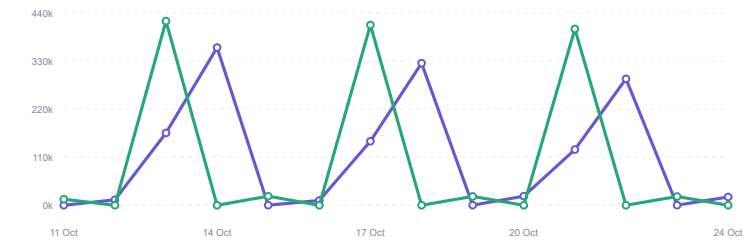

Sales	PKR 1,477,057.60
Purchases	PKR 1,311,552.00

Daily sales & purchases

14 DAYS

Daily totals ? last 14 days

Sales Purchases

How to read these charts: purple represents sales and green represents purchases. The circular chart shows each activity's share of this month's combined total. The daily line chart plots each day's transaction total; hover over points in the web dashboard for exact amounts.

SAMPLE ACTIVITY INCLUDED

A realistic customer walkthrough

The demo database contains **14 sample sales** and **7 sample purchases**, dated across the last 14 days. Sample invoices and parties are clearly marked with **DEMO**. The same transactions drive the dashboard cards, monthly comparison, daily trend, and stock history.

DAY-TO-DAY WORKFLOW

From setup to stock-aware transactions

Follow this sequence for a clean, consistent inventory workflow and reliable reports.

1 Set up your catalogue

Create categories, brands, units, and paper products.

2 Add product variants

Define SKUs and options such as size, colour, and GSM; set costs and selling rates.

3 Enter opening stock

Record the starting quantity for each product variant.

4 Set up your parties

Add customers and vendors before recording transactions.

5 Record purchases and sales

Choose a party, product variant, date, quantity, rate, and payment details.

6 Review and reconcile

Use stock movement, party ledgers, and reports to review activity.

DASHBOARD & NAVIGATION

Your daily control centre

- **Today and month-to-date:** sales and purchase totals update from saved invoices.
- **Analytics:** 14-day transaction trend and monthly sales/purchase comparison.
- **Operations:** sales, purchases, returns, parties, worker records, and payments.
- **Inventory:** active products, on-hand quantities, and low-stock alerts.
- **Quick actions:** add products, record purchases, record sales, and adjust stock.
- **Finance & reports:** expenses, ledgers, account activity, and summary reports.

Important for the customer presentation: all records marked **DEMO** are illustrative sample data only. They are not actual orders, customers, supplier balances, or financial results. Replace or remove them before using PaperFlow for real business operations. A recorded sale checks available stock and updates inventory; a purchase adds stock; an adjustment records the reason and movement.
